FREE CALLS
FROM YOUR WEBSITE
TO ANY DEVICE
FROM ANYWHERE IN THE WORLD
IN REAL TIME
www.allwebcall.com

WebRTC-based click-to-call real time communication allows website visitors to call you free of charge from anywhere in the world to any device: landline, mobile and tablet or desktop computer.

This new WebCall, WebRTC-based on the Google chrome platform, is easy to insert HTML code on any Web site, and on line visitors don't need to install any plugin nor download any additional software nor using their telephone to dial your company services or personnel contact.

No 0800 to dial - no VoIP connection provider.

Ways to use

Many ways you may use this service to call sales or support helpdesk, book air flights, fixe a meeting, reserve a table, hire a vehicle, book a vacation or leisure tickets.
Using Webcall Click to Talk button, you will get connected FREE of charge from anywhere, anytime to anyone and to any device.

Easy to use

It's so remarkably easy to use Webcall Click to call services. Just a button script code that can be embedded in any website pages that website visitors are browsing and then they can talk to a live person engaging a Webphone conversation.

Click on 'Allow'

Click on the 'Allow' icon on the webphone window displayed by Google chrome browser. This function will allow you to connect your headset microphone or within your computer`s integrated micro / speakers allowing you to connect with your desired destination.

Connection

The connection will be made and you will be able to talk to your destination contact. In the case of no reply, you have the option of leaving a voice message which will automaticly be sent by email.
